I am a software engineer who's passionate about bringing simple solutions to complex problems. My past experience as an immigration paralegal has groomed me to be an independent critical thinker, a team player, and an effective communicator. I have a drive for innovation, self-improvement, and success. I specialize in developing technology with React and Ruby on rails and I am always humble and eager to learn both within and outside the technology field.

TECHNICAL SKILLS

Python, Javascript, React, Redux, Flutter, Django, Ruby on Rails, MongoDB, Mongoose, Express.JS, Node.js, Git/Github, Enzyme, Jest, Rspec, Bootstrap, Sass, MaterialUI, SQL, PostgreSQL, GraphQL

PROJECTS

July 2020 — **Pagebook**

- Developed a fully responsive Facebook clone with React facilitating multiple reusable components,

- Used Ruby on Rails for the backend abiding to the Model-View-Controller (MVC) architecture and Sass for cleaner and more concise CSS code

- Implemented user authentication with bcrypt and JSONWebToken to securely store and manage user data and login sessions

June 2020 — **Yummy Dish**

- Collaborated with fellow software engineers and a team of UX designers to create a recipe app with React, bcrypt, JSONWebToken and Sass

- Implemented with MERN stack to allow for only Javascript code on the client side and server side

May 2020 — **Mei**

- Developed an Ecommerce makeup search site with React and "makeup API" where users can search for makeup products by names, categories, or concerns

- Integrated with Material-UI to allow for faster and simpler CSS design and with a unified theme throughout

EXPERIENCE

NYIS Law Firm
April 2019
⇓
